Public Works

## Road Commissioners Report January 23, 2023

In the last month the road crew has been working on many different jobs, such as cutting brush. Cutting brush and pruning trees helps with visibility while traveling on roads in town. This lets more sunlight on the roads which helps with icing and mud during the winter months. Cutting brush is also the first phase in preparation for the public works future drainage and road reconstruction plans. Some of the other project the crew has been working on this month are.

- Adding surface gravel to areas to help patch potholes.
- Fixing and performing maintenance on equipment.
- Checking roads and plowing and treat as needed.
- Cutting brush and picking up storm debris.
- Receiving and mixing road salt.
